TRADE LITE

ERP FOR A BETTER TRADE
TRADE FOR ALL AND ALL FOR TRADE

IT IS A DIFFERENT BALL GAME, ALL TOGETHER!

www.zestylabs.in

TRADE-LITE

Trade-Lite is specifically designed to serve trading and service companies, regardless of their size, sector, or location, offering long-term values of a minimum total Cost of Ownership and maximum return on Investment. The flexibility and adaptability of the system enable you to meet business challenges and respond to the changing market environment. **Trade-Lite** helps facilitate all key business processes in your organization.

Trade-Lite is powered by Odoo an open source ERP software vendor with over 5 million active users globally. With its vast range of modules and applications and a user friendly interface, TradeLite can be the perfect solution for managing the overall business in a centralized manner.

Accelerate your business and increase your turnover

We focus on increasing the business turn over by enhancing the operational efficiency through a combination of web, mobile and tablet solution. Making the right data available for the work force at the right time will increase the speed of doing business and thus increases the revenue multifold.

Knowing the credit balances and stock during order taking would help the customer to optimize the order. Instant information on the order like order status, pending items, dispatch status etc would help the marketing executives to have good customer dealing. Automated accounting would reduce the complexity of accounting. Easy handling of GST/VAT returns would ensure the compliance.

Accountability in Workspace

The powerful audit trail system keeps record of everything accomplished in Trade-Lite ERP software from requests for information and internal email communications, to approval of change orders and daily reports, holding all your project team members accountable for their Work.

Digital Approval System

Electronic Approval System (EAS) of Trade-Lite ERP allows the users to electronically send documents for approval. The system works according to the nature of the processes and Delegation of authorities, helping the organization to eliminate clerical errors, accelerate approval processes, improve interdepartmental communication, and to establish a clear workflow hierarchy.

Business Intelligence

Built-in business intelligence capabilities of Trade-Lite ERP provide a clear picture of how your financial and operational performances affect your business growth and goals. Improve your decision-making skills and judgements by tracking the percentage of job completion, Work in Progress, and monitoring performance and job profitability.

Run a Green Business
with Digital Documents

Trade-Lite ERP helps you create an environment-friendly paperless office by eliminating all your printing and filing requirements. Document Attachment System (DAS) allows you to electronically attach all relevant documents to your transactions. Document management system (DMS) ensures all your documents are secure and available according to Role-based Access Control.

Mobile Apps

Trade-Lite ERP runs on smartphones and tablets with dedicated applications, allowing you and your team members to gain precise business information straight away on a secured centralized hub.

Cloud Solution

Tradelite solution deployed in cloud server provides a secured access to your business data and optimize the access control to the authorized users alone. This also enables a seamless connectivity and ensure the data access through multiple digital devices from anywhere and at anytime.

Customizable to Fit Your Organization

Your business is unique with its own systems,structures, and ways of working. Through Trade-Lite customization services, organizations gain the rewards of solutions tailor-made to suit their unique requirements
